PRESS RELEASE

McNaughton-McKay Electric Company is pleased to announce its recent acquisition of all the assets of S+S/ GmbH and S&D GmbH (“S+S/S&D”) located in Wegberg, Germany, the largest Rockwell Automation distributor in Germany. S+S/S&D will operate under the name of Mc-Mc GmbH, McNaughton-McKay’s German subsidiary.

In response to customer feedback, McNaughton-McKay was focused on finding a European source for providing technical and logistical support for an increasingly complex supply chain. The acquisition of S+S/S&D brings McNaughton-McKay one step closer to accomplishing that goal.

S+S/S&D has annual revenues of approximately \$15 million. They serve a diverse market and have numerous sales locations throughout central and southern Germany. The S+S/S&D operation has been very successful in servicing production equipment OEM’s that ship their finished machines to U.S. based companies. Going forward the General Manager for Mc-Mc GmbH will be Werner Schüpfer, who was a partner in the former S+S/S&D. Matthias Kistler will be providing sales leadership in the new organization.

McNaughton-McKay opened in Detroit, Michigan in 1910 and currently has 22 U.S. locations in Michigan, Ohio, Georgia, and North & South Carolina.
