

# THE Electrical Connection

April 2010

Carrollton • Cartersville  
Covington • Norcross

**McNAUGHTON-McKAY**  
ELECTRIC COMPANY

Serving The Georgia Electrical Community...  
Celebrating 100 Years of Customer Service!

## 100th Anniversary Open House Celebration

*Tuesday, May 4th  
11:00 AM - 2:00 PM*

McNaughton-McKay Electric Georgia invites you to join us at our 2010 **NORCROSS** Open House as we celebrate 100 years of customer service in the electrical industry.

This event will include a showcase of new products and solutions relative to the electrical industry by over forty key industrial vendors. Enjoy some good old southern BBQ and register to win the door prize.

For more information and to pre-register visit our web site at [www.mc-mc.com](http://www.mc-mc.com).

### FUSION G7™ Global Wall-Mount Enclosures Set New Flexibility and Performance Standards

The new FUSION G7™ Wall-Mount Enclosure system from Hoffman takes internal component

mounting versatility and rugged IP66 protection to the next level.

FUSION G7 expands the traditional limits of capacity and creates the most efficient and cost-competitive enclosure footprint available. While excelling at basic enclosure functionality and protection, FUSION G7 also features an advanced, scalable design with a host of internal component mounting provisions and options to create an increased internal mounting area within the same, or smaller, footprint than a traditional wall-mount enclosure. The optional internal front and rear grid system provides rigidity and functionality while serving as the backbone attachment system for the wide range of flexible internal mounting accessories.

### LQM Quantum® Thermoplastic

The Lithonia LQM Exit Signs are ideal for applications requiring attractive, quick- installation and low energy consumption. They have a precision-molded thermoplastic housing that is impact and scratch-resistant, corrosion proof and UV-stabilized to resist discoloration.

Its innovative snap-together design allows installation in less than three minutes. The long-life LEDs feature very low energy consumption and have a life rating of up to 10 years (consumes less than one watt of energy). Lithonia's fully assembled single-face exit sign comes equipped with an optional extra faceplate for easy field conversion to a double-face standard exit sign. The replaceable chevron directional indicator knockouts make it easy to choose which direction your signs face. To ensure that your exit signs work when needed there is an automatic recharge after discharge feature. The conveniently located test switch and status indicator provide visual and manual means of monitoring system operation. The self-diagnostic emergency signs comply with NFPA Life Safety Code® and automatically test the battery once a month for five minutes and once every six months for 30 minutes.
