McNAUGHTON-McKAY
ELECTRIC COMPANY

Serving The Georgia Electrical Community...
Celebrating 100 Years of Customer Service!

Come Join Us for Our 100th Anniversary Open House Celebration

McNaughton-McKay Electric Georgia invites you to join us at our 2010 **NORCROSS** Open House as we celebrate 100 years of customer service in

the electrical industry. This event will include a showcase of new products and solutions relative to the electrical industry by over forty key industrial vendors. Enjoy some good old southern BBQ and register to win one of two great door prizes.

Tuesday, May 4th
11:00 AM - 2:00 PM

For more information and to pre-register visit our web site at www.mc-mc.com.

Upcoming Training

- May 4th - Norcross Open House - Norcross, GA
- May 18th - Intro to Logix Workshop - Cartersville, GA
- May 19th - Intro to Ethernet/IP Workshop - Cartersville, GA
- June 8th - FactoryTalk AssetCentre Configuration, Alpharetta, GA
- June 14th - 19th - Integrated Architecture on Tour, Norcross, GA
- September 23rd - Tools for Reliability, Carrollton, GA
- October 7th - Tools for Reliability, Cartersville, GA

SolaHD SCP-X Extreme Environment Series

The SCP-X is a rugged power supply designed for use in extreme environments. The metal case reduces

costs by eliminating separate enclosures. Quick change connectors simplify connectivity for distributed I/O devices on industrial machinery. This model provides 24 Vdc output with limited power to meet Class 2 requirements. Three models are currently offered based on application. This extreme environment power supply is ideal for outdoor or wet chassis-mount applications. The SCP100S24X-CP is designed for Control Power applications where a grounded power supply output is required. The SCP100S24X-DVN is designed for DeviceNet™ applications where an isolated output from ground is required.

High-performance, high-brightness Champ® VMV LED luminaire -brilliantly combining safety, reliability and energy efficiency

We are now stocking the Champ® luminaires. This luminaire provides the same durability and reliability of a traditional Champ luminaire, coupled with the low cost of ownership and energy efficiency of Cooper Crouse-Hinds LED technology. High-performance LEDs and a solid-state electronic driver provide light where you need it, at a fraction of the operating cost of HID technologies.

VMV LED Series luminaires are designed to provide full-spectrum, crisp white light with a true IES type V distribution. This white light output provides the human eye with better visual acuity compared to the poor rendering and color quality produced by a typical HPS fixture. Three versions of the Champ VMV LED are available, providing ideal solutions for a wide range of applications.
