ControlLogix Programmable Automation Controllers

1756-L73, -L75

The latest addition to the ControlLogix® family of controllers is designed for improved performance. The new controllers, the L73 and L75, provide the memory, speed and processing capabilities to meet the demands of basic plant floor applications to high performance process and motion applications.

Improved Performance

Depending on your application, you evaluate performance using different criteria. ControlLogix 1756-L73 and -L75 controllers offer specific improvements for specific applications.

Power and Diagnostic Capabilities

With the launch of these new controllers, Rockwell Automation also introduces the Energy Storage Module (ESM) which ships with each controller. The ESM eliminates the need for lithium batteries as well as the maintenance and environmental issues associated with the transport and disposal of lithium batteries.

Tools for Reliability

Come join us in our Norcross location on August 12th from 8am to 5pm to learn more about making an impact for your company with Thermal Imaging, Power Quality, Vibration Analysis, Networking and Industrial Ethernet/TP.

The cost for this class is \$99.00 and includes:

- 8-hour session on reliability
- Hands on instruction
- Fluke 411D Distance meter (\$99 Value)
- Seminar Workbook (\$25 value)
- Certification of completion
- Lunch

Small, consistent changes can make a big difference in the profitability of any facility. Find problems fast, fix them, and win by realizing the cost savings. For more information or to register for this class, please contact Sharon Cagle at cagles@mc-mc.com or 770-825-8689.

Upcoming Training

- Aug 5 - Hands On Thermal Imaging Seminar - Atlanta, GA
- Aug 9 - EtherNet TCP/IP for PLC Technicians - Carrollton, GA
- Aug 10 - ControlLogix Processor Basics - Carrollton, GA
- Aug 11 - Introduction to SLC, Carrollton, GA
- Aug 12 - Tools for Reliability, Norcross, GA
- Nov 3 & 4 - Rockwell Automation Fair, Orlando, FL

Special Requirements?

Modification Services Provides a Solution

With Hoffman Modification Services, many of the standard enclosures can be

modified to suit your specific requirements. They use the most advanced technology to produce consistent, high quality results. Their modified enclosures are UL/cUL and CSA certified solutions. You can select from more than 100 standard paint finishes. Change dimensions. Easily add holes, cutouts, window kits, louvers and thermal management systems.

To begin, just find a standard enclosure similar to your intended design. A McNaughton-McKay representative can assist you with this or you can visit www.hoffmanonline.com and browse their online product catalog. You can also learn more about options tailored for each product family on the Hoffman website under their services tab.

ULTRA LED Retrofit PAR30 Long Neck Lamps

Dimmable

Sylvania's LED technology offers reduced energy and maintenance costs when compared with conventional light sources. ULTRA LED PAR30 Long Neck retrofit lamps are intended to be a high quality replacement for 50W halogen PAR30 Long Neck halogen lamps while offering 20 times the life. They are free of UV and IR radiation, minimizing discoloration and fading of materials. These lamps are dimmable down to 10%, and are rated at 50,000 hours life with a correlated color temperature (CCT) of 3000K and 87 CRI. These lamps are available with 25° and 40° beam angles.

No warm-up time, instant-on with full light output and stable color
• 50,000 hours life at 70% lumen maintenance • RoHS compliant • Suitable for use in indoor and outdoor environments • Suitable for dimmers or in luminaires controlled by a dimmer
