FactoryTalk Batch

Optimization of Batch Manufacturing Processes

Rockwell Automation's FactoryTalk Batch provides efficient, predictable batch processing, consistency between batches, and generation of event information during batch runs. FactoryTalk Batch process management lets you reuse code, recipes, phases, and logic between processes with similar procedures. FactoryTalk Batch brings all facets of batch automation and process management together, providing the most comprehensive batch management software available.

FactoryTalk Batch can improve quality and increase production in many industries such as chemical, pharmaceutical, food, beverage, heavy industry, and pulp and paper.

FactoryTalk Batch combines the ISA S88 standard with proven technology that provides the flexibility you need to supply your product to market faster.

Level I Thermography Course:

2648803 - On Site: Infrared Level I Course (4 days)

This course will be held on October 18 - 21, in our Greenville, SC office and is designed for infrared thermographers with no prior training or those who have had only operator training. Snell Infrared uses a variety of techniques, including hands-on demonstrations, to teach about infrared theory, all major applications, and camera operation. The course fully meets ASNT's educational requirements for Level I certification.

Don't have a camera? Don't worry, we even have a special discount bundle (camera & toughbook) available to those who are attending this course!

The course runs from 8:00 AM - 5:00 PM and is \$1,695/person. Infrared thermal imaging is an exciting technology with diverse applications used in numerous industries. To register for this class, please contact Becky Walters at earnharb@mc-mc.com.

Fluke 810 Vibration Tester

Take a vibration expert along. Get answers now!

An entirely new approach to troubleshooting mechanical problems.

Control downtime, prevent recurring problems, set repair priorities, and manage your resources with an entirely new approach to vibration testing. In three quick steps, it helps you locate and diagnose common mechanical problems on the spot.

The Fluke 810 analyzes common equipment like motors, fans and pumps to determine the root cause and location of mechanical failure. It gives you an immediate fault severity assessment and repair recommendations. Helps technicians quickly understand machinery health and work more efficiently and effectively. Additionally, it helps managers: Control downtime by anticipating problems earlier; Eliminate recurring failures by identifying root causes; Bridge skills gap by capturing decades of mechanical experience in one tool.

ClipperCreek Charging Station

The CS line of Electric Vehicle Charging Station is designed to the highest quality giving your vehicle a full charge every time.

The CS line offers multiple currents to allow you to charge your vehicle at the highest possible rate.

ClipperCreek's software based safety technology with reclosure takes the extra step to ensure your vehicle is charged.

The ClipperCreek and its line of EV Charging Products are a leader in supporting the tremendous upcoming infrastructure demand to support new electric vehicles including the Chevy Volt. ClipperCreek's UL Certified, SAE J1772 compliant charge stations are the only UL Listed Level 2 products available on the market today.
