THE Electrical Connection

November 2010

McNAUGHTON-McKAY
ELECTRIC COMPANY

Serving The Georgia Electrical Community...
Celebrating 100 Years of Customer Service!

STRONGARM

Simplify your next operator interface project with a STRONGARM enclosure and mounting combination.

STRONGARM enclosures are designed to your exact terminal specifications; including the cut-out, cable space, drive access and cooling requirements. Specify pushbutton cut-outs and other extras to complete the ideal, hassle-free enclosure to complement your STRONGARM mounting. Enclosures are specially reinforced for pendant arm mounting to assure solid, wobble-free operation.

Also available in NEMA 4/12 version.

Fluke 810 Vibration Tester

Take a vibration expert along. Get answers now!

An entirely new approach to troubleshooting mechanical problems.

Control downtime, prevent recurring problems, set repair priorities, and manage your resources with an entirely new approach to vibration testing. In three quick steps, it helps you locate and diagnose common mechanical problems on the spot.

The Fluke 810 analyzes common equipment like motors, fans and pumps to determine the root cause and location of mechanical failure. It gives you an immediate fault severity assessment and repair recommendations. Helps technicians quickly understand machinery health and work more efficiently and effectively. Additionally, it helps managers: Control downtime by anticipating problems earlier; Eliminate recurring failures by identifying root causes; Bridge skills gap by capturing decades of mechanical experience in one tool.

Upcoming Training

November 9 - ControlLogix Processor Basics - Cartersville, GA

November 10 - EtherNet TCP/IP for Technicians - Cartersville, GA

The Leader in I/O for the Industrial Controls Marketplace

Spectrum Controls is the first company to build licensed, core-technology I/O modules for the Rockwell Automation product line. Our innovative designs incorporate state-of-the-art features with dependable performance. As a global Encompass partner, technical support is offered through the Rockwell TechConnect Support program, for every Spectrum Controls I/O module at no additional cost to the customer. Our market-driven I/O product offering provides cost-effective solutions to complex application requirements. High performance, increased channel density, and versatile configuration options are just a few of the advantages of using I/O from Spectrum Controls.

RAB Lighting 20 Watt LED Wallpack

RAB Lighting shoots for the heart of the commercial outdoor lighting market with an affordable LED product, the LPACK 20.

RAB LED fixtures are a fraction of the initial cost of competitive products. The total cost of ownership of an LPACK 20 is reduced further with a 50,000 hour LED lamp life, eliminating the need for multiple lamp changes.

The LPACK 20 competes with the traditional lighting alternatives in quality of light delivered. Available in both warm and cool light, the 20 watt LPACK has two high-output, 10 watt LED light engines that deliver 70% of their rated lumens at 50,000 hours and have a voltage sensing driver for 120 up to 277 volts.

A small carbon footprint is achieved with a unique design specifically engineered for LEDs which uses 50% less aluminum and glass than a standard wallpack. Advanced Thermal Management assures that LED Light Engine life is maximized with a thick, die-cast housing and heat-sinks that dissipate heat away from the critical LED components.

All RAB LED products have a five year warranty, are UL Listed for Wet Locations and have earned the U.S. Department of Energy's Lighting Facts label. Additionally, the optical performance of the 20 watt LPACK is compliant with IESNA full-cutoff, fully shielded standards and has been awarded IDA Dark Skies Compliance. The LPACK 20 can be used on LEED buildings for Light Pollution Reduction credit.

Carrollton Branch
102 Cable Industrial Way
