ELECTRIC COMPANY

Serving The Georgia Electrical
Community for 100 Years and Counting!

Create a 21st Century Control Room with the ThinManager® Platform

ACP has taken its award-winning ThinManager Terminal Services management and configuration software and transformed it into a new software platform that allows unprecedented visualization, management and security for your entire automation process.

ThinManager is well known for its ease of use when it comes to managing Terminal Servers and Thin Clients and for many years has offered modules that expand ThinManager's functionality. They are now taking several of the popular modules and rolling them into the core ThinManager product. MultiSession, which allows multiple terminal server sessions to run on one thin client, is the foundation on which ThinManager's functionality is now based. They have also moved in Instant Failover, Load Balancing (with queuing), Shared Keyboard & Mouse and many others.

Maximize Reliability with Factory Authorized Repair on Allen- Bradley Products

Just fixing the problem that caused your equipment malfunction isn't always enough to guarantee its proper operation. Unlike other repair services, our comprehensive seven step remanufacturing process restores your equipment to its original operating condition to make sure it will function reliably. Depending on the service level selected, all remanufactured equipment includes a 12, 18 or 24 month comprehensive warranty.

All remanufactured equipment also includes

- Installation of applicable updates/enhancements
- Replacement of failed/aged components
- Dynamic functional testing
- Cleaning and cosmetic restoration

to learn more about the details of our Remanufacturing and Exchange Services, or contact contact Greg Tiller at tillerg@mc-mc.com to discuss how these services can work for you....

Upcoming Training & Events

February 10: Plantwide Benefits of EtherNet/IP - Atlanta, GA

Panduit's PanTher™ LS8E Hand-Held Thermal Transfer Printer

The PanTher™ LS8E Hand-Held Thermal Transfer Printer produces high-quality, industrial labels on a wide variety of label materials for electrical and network applications such as wire/cable, components, safety, and facility identification. A partial cut feature provides the flexibility to create tear-apart labels for quicker installation. The printer uses label cassettes that contain an integrated memory device for automatic formatting, recall of last legend used, and the number of labels remaining in the cassette. The fast-loading P1™ label cassettes include both label material and ribbon to make changing labels easy. Part of the complete line of identification solutions from Panduit, the PanTher™ LS8E Printer is compact, rugged and easy to use on-site to meet the demanding requirements of electrical and network users, while delivering productivity gains throughout the physical infrastructure.

McNaughton- McKay's Government Procurement Guide

McNaughton-McKay is committed to supporting the Government at all levels with their electrical and MRO procurement needs. Our dedicated government specialist provides solutions on a global, national, and local level. McNaughton-McKay's knowledge of the Government procurement process and quality requirements ensures accurate results with on-time delivery.

McNaughton-McKay has satisfied all requirements as defined by supplyFORCE as the Contract Holder for GSA Schedule GS-21F-0117W. As an Authorized Representative, McNaughton-McKay supports supplyFORCE GSA Schedule GS-21F-0117W as a vehicle to pursue and conduct business with all Federal Agencies and entities in its Trading Area. For additional information about our Government program, please email us at govsales@mc-mc.com.
