ELECTRIC COMPANY

Serving Our S. E. Michigan Electrical Community for 100 Years and Counting!

SensaGuard™ RFID Non-Contact Safety Switches

When it comes to machine safety, Rockwell Automation® knows that protection of personnel and equipment is your main concern. At the same time, flexibility and productivity are points that must also be considered as you design your safety system. Optimize all of these with the new Allen-Bradley® SensaGuard family of non-contact switches.

SensaGuard non-contact safety switches are Category 4 / SIL 3 rated switches per EN954-1, TÜV functional safety approved to IEC61508. Featuring the latest generation of RFID technology for coding and inductive technology for sensing, SensaGuard large sensing range and tolerance to misalignment is a cost-effective solution that is ideally suited for a wide range of industrial safety applications. Switches can be connected to a standard safety relay, for example, the MSR126, MSR127, MSR200/300 Family, SmartGuard™ and Safety I/O Blocks.

Cementex CONTRACTOR SERIES HRC-2* Kits

The New Contractor Series from Cementex is the perfect blend of high quality safety equipment in an affordable package. This new series provides qualified electricians the safety they deserve and the value they require in complying with OSHA, and NFPA 70E guidelines. Each HRC-2 Contractor kit includes; Coveralls (made in the USA), Arc Flash Face Shield and Dielectric Hard Hat (10 Cal Rated), Balaclava Sock Hood, Safety Glasses, and Earplugs. All of which are required to achieve compliance with NFPA 70E Hazard Risk Category 2. Customize your kit by including a set of 1000V Rated insulated Tools, a convenient Backpack or Class Rated Insulating Rubber Gloves.

Upcoming Training & Events

- February 15: GuardLogix Maintenance and Troubleshooting - Troy, MI
- February 17: GuardLogix Application Development - Troy, MI
- February 21: Kinetix 6000 Maintenance and Troubleshooting - Troy, MI
- February 23: RSLogix 5000 Level 4: Motion Programming Using Ladder Logic - Troy, MI
- February 23: Machine Safeguarding Safety Seminar - Madison Heights, MI
- February 24: LOTO / PPE / ArchFlash / Safety Seminar - Madison Heights, MI

Panduit's PanTher™ LS8E Hand-Held Thermal Transfer Printer

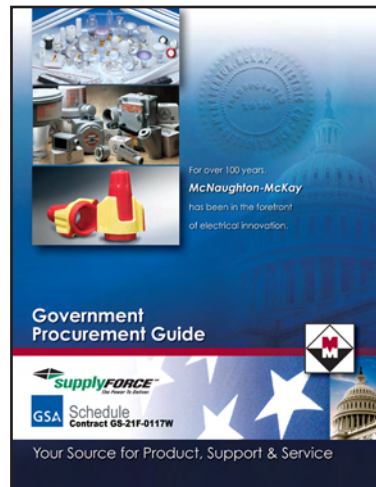

The PanTher™ LS8E Hand-Held Thermal Transfer Printer produces high-quality, industrial labels on a wide variety of label materials for electrical and network applications such as wire/cable, components, safety, and facility identification. A partial cut feature provides the flexibility to create tear-apart labels for quicker installation. The printer use label cassettes that contain an integrated memory device for automatic formatting, recall of last legend used, and the number of labels remaining in the cassette. This fast-loading P1™ label cassettes include both label material and ribbon to make changing labels easy. Part of the complete line of identification solutions from Panduit, the PanTher™ LS8E Printer is a compact, rugged and easy to use on-site to meet the demanding requirements of electrical and network users, while delivering productivity gains throughout the physical infrastructure.

McNaughton-McKay's Government Procurement Guide

McNaughton-McKay is committed to supporting the Government at all levels with their electrical and MRO procurement needs. Our dedicated government specialist provides solutions on a global, national, and local level. McNaughton-McKay's knowledge of the Government procurement process and quality requirements ensures accurate results with on-time delivery.

McNaughton-McKay has satisfied all requirements as defined by supplyFORCE as the Contract Holder for GSA Schedule GS-21F-0117W. As an Authorized Representative, McNaughton-McKay supports supplyFORCE GSA Schedule GS-21F-0117W as a vehicle to pursue and conduct business with all Federal Agencies and entities in its Trading Area. For additional information about our Government program, please email us at govsales@mc-mc.com.
