McNAUGHTON-McKAY
ELECTRIC COMPANY

Serving The Georgia Electrical
Community for 100 Years and Counting!

PanelView™ Plus 6 - 700, 1000, 1250, and 1500 Terminals

Machine-level HMI

Over the years Rockwell Automation has earned a reputation for offering a wide range of scalable visualization solutions, available in multiple configurations and sizes. PanelView Plus is one of the most versatile operator interface options within that suite of visualization solutions. Now Rockwell Automation is enhancing this product line by adding more power and features like expanded memory, a faster processor and Microsoft Windows CE 6 operating system.

PanelView Plus 6 terminals are available in a variety of modular display sizes, enabling you to select exactly what is required for your application. This provides a standard base of modules and customizable features to use across multiple applications, reducing maintenance and inventory costs.

To meet more stringent environmental conditions; high-bright, conformal-coated and marine certified displays modules are also available.

Keep Current with New Products and Technologies

McNaughton-McKay is committed to providing you with the information you need to take advantage of the newest, most innovative products and technologies available. Mark your calendars to attend one of our quarterly update sessions, conveniently offered at all of our Georgia locations. You will hear about recently released products and technology developments that will allow you to stay a step ahead of the competition.

All sessions will be held from 11:30 – 1:00,

Lunch included – registration required

May 23 – Carrollton

May 24 – Norcross

May 25 – Cartersville

May 26 – Covington

Upcoming Training

May 3: Machine Safety Seminar - Atlanta, GA

May 17: Introduction to PLCs - Carrollton, GA

May 18: SLC & MicroLogix Introduction - Carrollton, GA

June 13 - 16: Level I Thermography Certification - Norcross, GA

June 28: Introduction to Logix 5000 - Cartersville, GA

June 29: Introduction to Ethernet - TCP/IP - Cartersville, GA

SolaHD SURGE PROTECTION

*First Line of Defense in
Limiting High-Impulse
Transients*

High-energy transients either externally or internally generated pose an immediate threat to the reliability and performance of your sensitive electronic equipment. SolaHD recommends placing high-energy Surge Protective Devices (SPDs) on key panels throughout your facility. Within your facility, motors, inductive loads and various equipment load switching can cause damage or costly downtime.

SolaHD's surge-protective devices focus on limiting high-voltage spikes to a level that is acceptable to most electronic equipment. Plus, they're a great first line of defense, using components that are placed in parallel with the line and serve as clamping mechanisms for high-energy impulses. Protection at this level is referred to in the industry as Sine Wave Tracking or electronic grade. Surge Protective Devices are typically installed at service entrances and on larger distribution panels.

Get the Most Out of Your Roof

*Sunkits Put it All Together
for You*

Installing a solar PV system on your roof is like getting paid to reduce your carbon footprint. SolarWorld's Sun at Work® program, makes it simple to maximize your financial and environmental returns.

SolarWorld starts with their industry-leading SolarWorld Sunmodules and combines them with top of the line inverters and racking, specially selected for the highest system-level performance. Each Sunkits® system is custom-designed at the factory for your home and your family's energy use. SolarWorld's network of factory-trained state-licensed installers ensures that your system is installed safely and effectively. For more info contact us at gogreen@mc-mc.com.
