

Energy Submeter Application Seminar and Software Demonstration

When: Wednesday, February 15th from 10:00 AM – 12:00 Noon

Where: McNaughton-McKay, 2745 Whitehall Park Drive, Suite B, Charlotte

RSVP to Amy Pace | Phone: 704-527-6555 | Email: pacea@mc-mc.com

Factory associates from Leviton Manufacturing will provide an application overview and software demonstration on the new Leviton sub-metering system. The product line and Cloud based software application enables users to measure, monitor, report and analyze energy usage and demand for plant work cells, equipment, buildings, circuits and/or specific loads.

TAKE CONTROL OF ENERGY USAGE IN YOUR FACILITY WITH A LEVITON ENERGY SUBMETER SYSTEM

Energy Submeter Demo Special Offer

McNaughton-McKay will offer seminar attendees a “Demo Special” that includes (1) Leviton electric sub-meter, (1) energy monitoring hub, (1) user software license

Leviton Cat. No.	Description
2N480-T41	277/480V 3-phase, 4-wire, 400 amp electric sub meter with three split core current transformers. *Consult factory representative for different voltage or amperage requirements
A8812-1	Energy Monitoring Hub with eight pulse inputs for electric, water or gas sub meters. Connects to the Leviton 2N480 energy meter and uploads pulse data.
LEMSB	Energy Manager Monitoring Software with detailed reporting that includes daily, weekly and monthly usage reports. Additional reports include peak demand for any time interval and carbon emissions reports.
Demo Special Cost from McNaughton -McKay: \$3,000.00 Limit One Demo Special Per Participating Company
