Type	Max. Service Temp. °C	Colour	Finish	Use	Special Properties	
Polyolefin						
B-407	90	30 days	Clear	Matt	General purpose labelling	Clear Polyolefin
B-449	90	30 days	White	Matt	Temporary labelling application	Removable; good solvent resistance and print performance
Polypropylene						
B-425	90	30 days	White	Matt	Rating plates and general purpose labelling	Excellent chemical, abrasion and smudge resistance in combination with R-6400 ribbon HF  
Sleeve Material						
B-341	130	1 000 hrs	White	Matt	Wire marking	2:1 shrink ratio, self-extinguishing; meets AMS-DTL-2353/5 Class 1; SAE AS 81531; MIL-STD-202 method 215 and UI224
B-342	130	1 000 hrs	White/Yellow	Matt	Wire marking	3:1 shrink ratio, self-extinguishing; meets AMS-DTL-2353/5 Class 1; SAE AS 81531; MIL-STD-202 method 215 and UI224 HF
B-7641	105	continuous	White/Yellow	Matt	Wire and cable identification	2:1 shrink ratio Heat shrinkable, flame retardant halogen free
B-7642	175	24 hours	White/Yellow	Matt	Wire and cable identification	2:1 shrink ratio Heat shrinkable
Tag Material						
B-109	80	30 days	White	Matt	Multi-purpose identification tag, where durability and computer printability are required	Cross-laminated polyethylene provides extreme tear resistance and excellent cold-weather performance HF
B-411	50	30 days	White	Matt	Tag material designed for general purpose marking	Spunbound polyolefin provides resistance to water and chemicals
B-412	100	30 days	White	Matt	Wire, cable and product inventory identification	Polypropylene tag designed for outdoor and harsh environmental applications or where tensile strength is needed
B-7597	50	30 days	White	Matt	Wire and cable marking	200 micron tag material
B-7599	50	30 days	White	Matt	Wire and cable marking	250 micron tag material
B-7596	100	1 000 hours	White	Matt	Tag material and tags	Tag material

Ribbon Information Guide

All Brady ribbons are developed to meet the performance requirements of the materials to be printed. The reason for this is that the bond between the ribbon and the label is critical to the success of the legend permanence. Brady offers a complete line of ribbons that are designed to cover all your label application requirements.

Please refer to Ribbon/Material Cross Reference Chart on the following page to determine the appropriate ribbon/material combination.

Ribbon Series	Formulation	Available Colours	Performance Characteristics
R-4300 = R-7950	Wax/Resin	Black	Strong environmental resistance against smearing and chemicals, reliable sharp-edge
R-4400	Resin	Blue, Green, Red & White	High density, excellent solvent resistance, high heat resistance, super scratch resistance. print quality to maximise bar code readability.
R-4500	Wax/Resin	Blue, Green, Red & Silver	Strong environmental resistance against smearing and chemicals, reliable sharp-edge
R-4900	Resin	Black	Superb smear resistance at high temperatures. Superior solvent resistance.
R-6000	Resin	Black	High density, excellent solvent resistance, high heat resistance, super scratch resistance.
R-6400	Resin	Black	Ultra high chemical resistance in combination with specific materials
R-7942	Wax	Black	General purpose, low cost ribbon for paper or temporary labelling.
R-7953	Wax/Resin	Black	Low cost alternative for R-7950 with lower chemical and smear resistance.
R-7960	Resin	Black	Good solvent resistance, lower for alcohol, high print quality and excellent smear resistance.
R-7961	Resin	Black	Low cost resin ribbon with excellent scratch resistance and with good chemical performances

How to find out how many labels per THT ribbon:

Our THT ribbons are 300 metres long.

300 m = 300 000 mm

300 000 divided by label vertical repeat = labels per ribbon

To find your vertical repeat, see Index starting on page 79. Use column D for your vertical repeat.

Label Index by Size

Part number explanation:

Most Brady part numbers for printable labels follow the same four-part format:

The first code indicates the technology, the second part is a number indicating the die size used (where applicable), the third part indicates the Brady material used (where applicable), and the final code indicates package quantity.

THT-11-423-10

Thermal Transfer Technology Die # 11, 6.35 x 6.35 mm Material B-423, White Polyester Package Quantity, 10 000

THERMAL TRANSFER LABELS

Circuit Board and Component Identification Labels

Brady polyimide materials are specially engineered to resist the harsh environments associated with the processing of printed circuit boards, including the high temperatures associated with lead-free processing. The B-473, B-477, B-478 and B-479 materials can also help reduce ESD by utilising a static dissipative adhesive and liner.

Labels using Clean Liner Technology

Brady's Clean Liner Technology (CLT) labels with zero over-cutting and zero adhesive oozing, eliminate an estimated 95% of the automated label application problems, stopping downtime and saving customers money.

Brady CLT labels are utilised with the latest converting technology which offer our customers an unparalleled quality of labels for today's high demanding auto-apply applications. Traditional labels are produced on conventional presses and will offer a less consistent die-cut and liner quality.

Our standard range of thermal transfer CLT labels are especially suited for use in Brady's Automatic Printer Applicator Machines - PAM3000 and PAM3600 but also in all common Automatic Label (Printer-) Feeders in the market, for example, Hover-Davis LP and POD600 feeders.

Brady's range offers zero over-cutting and zero adhesive ooze, which offers Brady customers

- No liner breakage due to over-cutting
- Zero unplanned downtime due to label misplacement
- No misprints due to quality of labels
- A complete, high quality solution when purchased with the Brady PAM range
- Peace of mind when specifying Brady labels

The CLT standard range exists of parts initially focussed on small labels for PCBA identification applications. All sizes utilise the industry leading B-457 material. However, CLT is suitable for a myriad of applications and custom parts and many Brady standard materials are available for custom quoting.

For guaranteed results, we always recommend using the CLT labels with our PAM range of applicators.

Sleeves for Wire and Cable Marking by Size

3:1 Shrink Ratio Single-sided Printable PermaSleeve™ Wire Markers

PermaSleeve markers fit snugly around wires for maximum insulation protection and permanent identification.

Brady PermaSleeve full-circle insulating wire markers meet the rigid insulating, material requirements and physical properties of MIL-DTL-23053/5 Class 1, MIL-M-81531, MIL-STD-202F, METHOD 215, and UL224. The heat-shrinkable irradiated polyolefin does not smudge or fade when printed. The unique flattened full-circle design provides fast, permanent wire marking. PermaSleeve markers may be printed on Brady's thermal transfer printers.

Sleeves for Wire and Cable Marking

Heatex™ Identification Systems

Heatex is a marking system for identification of wires, cables, tubes and equipment that offers a superb combination of clarity and durability. The markers are nicely organised on a thermal printable backing liner. This allows you to print the mounting instructions next to the marker. This you simply state on the liner where the marker should go. Can save you time and the trouble of carrying blueprints into the work-shop.

Sleeves for Cable Markers

Heatex™ Cable makers – B-7643

The Heatex cable markers are made of a Thermoplastic Polyether-Polyurethane (PUR), zero halogen material, suitable for both thermal and dot matrix printing. The markers are supplied on a thermal transfer printer liner which allows you to print mounting instructions on the liner! The markers can be printed with any THT printer.

The markers can be removed one by one of the liner, which allows you to print big batches and use each marker at the time when you need it.

Laminat™ Carriers and Tags

When you are looking for cable markers with extreme durability, the Laminat range is the solution.

The Laminat consist of two parts:

Laminat™ Carriers (B-7644)

Laminat™ Tags (B-7645)

Laminat™ Carriers (B-7644)

Laminat™ carriers for cable identification with strip to laminate text label. The carrier is fixed directly on a cable or wire with two cable ties. Zero Halogen - Polypropylene carrier with clear polyester adhesive.

The Laminat™ Carriers can be used for any type of cable identification where permanency of the legend is crucial.

Follow these steps to mount the label onto the Laminat™ carrier:

1) Pull the protective foil backwards

2) Place the label in the middle leaving space for sealing on all four sides of the label.

3) Seal the carrier by placing a finger on the foil and pushing forward, thus rolling over the foil and rolling off the silicon liner.

4) Always feed the cable ties from the top, thus bending down the Laminat™ carrier along the cable.

1 = Lowest Adhesive Bond

10 = Highest Adhesive Bond

These charts are based on relative adhesion after 24 hour dwell within each given surface energy category. Adhesion is the attraction between unlike materials. The strength of the adhesion is determined by the surface energy of the item being identified. The higher the surface energy, the greater the likelihood for the label to adhere. A lower surface energy product will be more difficult for a label to adhere.

Application of PermaShield™ labels is easy. Print the label on a thermal transfer printer and put in place, covering with the clear overlaminate.

Brady's durable, easy-to-read labels help you keep track of assets. Ideal for bar coded inventory control.

Brady's metallised polyester material is perfect for on-demand printing of serialised rating plates. It eliminates the lead time needed for purchasing pre-printed labels, giving you better control over label design and cost.

Water indicating labels provide clear evidence of water intrusion for controlling invalid warranty claims, failure analysis, design assistance or repair troubleshooting.

Brady offers several tamper-resistant label materials that are ideal for package seals. If desired, covert or overt security features can also be added to provide additional package protection.

Tamper-evident labels are ideal for warranty fraud protection. They're designed to leave a footprint when the label is removed. In addition, a pattern will appear on the top surface of the label in order to prevent it from being reused.

Ribbon Information Guide

Ribbon Series	Formulation	Available Colours	Performance Characteristics
RGR	Wax/Resin	Black	Strong environmental resistance against smearing and chemicals, reliable sharp-edge
RGW	Wax	Black	General purpose, low cost ribbon for paper or temporary labelling.
RPR	Resin	Blue, Green, Red & White	Ribbon with excellent print quality, smear and scratch resistance, available in blue, red, green and white.
R-4900	Resin	Black	Superb smear resistance at high temperatures. Superior solvent resistance.
R-6000	Resin	Black	High density, excellent solvent resistance, high heat resistance, super scratch resistance.
R-6400	Resin	Black	Ultra high chemical resistance in combination with specific materials
R-7942	Wax	Black	General purpose, low cost ribbon for paper or temporary labelling.
R-7953	Wax/Resin	Black	Low cost alternative for R-7950 with lower chemical and smear resistance.
R-7961	Resin	Black	Low cost resin ribbon with excellent scratch resistance and with good chemical performances
R-7964	Resin	Black	Low cost resin ribbon with excellent scratch resistance but with moderate chemical performances. Excellent ribbon for smooth surface, ideal for the automotive market.

Circuit Board and Component Identification Desk-top printer Series

B-652 polyimide withstands extremely high temperatures. Ideal for marking the underside of printed circuit board and for surface-mount applications. Remains legible after contact with solder, flux and cleaning solvents

DuraSleeve® Wire Marking System

Brady DuraSleeve Markers Create a Durable Legend

Combining speed, power and flexibility. The Durasleeve wiremarking system provides the logical next chapter in the Brady legend. That's because the Durasleeve wire marking system does everything your current wire marking system does, and then the provides advantages you can't find anywhere else.

Durasleeve wire marker inserts fit into clear carriers.

- Durasleeve wire marking system meets current engineering specifications.
- Durasleeve wire marking system reduces inventory by providing markers "just-in-time".
- Durasleeve wire marking system saves time by printing legends on-demand.
- Durasleeve wire marking system performance meets or exceeds any materials you are currently using.
