Occupancy and Vacancy Sensors

Brand Features

Leviton offers many products that will help lower electrical costs and add convenience to everyday living. By simply replacing standard switches with occupancy sensors reduces energy consumption and extends bulb life. Leviton's Decora Manual-On Occupancy Sensor Switch complies with California Title 24 by requiring the user to manually turn the lights ON but will automatically turn the lights OFF when a space is unoccupied. It ensures that lights are not left ON unnecessarily for hours at a time. It uses "passive infrared technology" in order to detect human presence in a room, and respond to the infrared heat people naturally emit to monitor a specific area. When this "heat" is sensed, the lights will stay ON in the room, and then turn the lights OFF, when the space is vacated or are unoccupied. Compatible with Decora screwless snap-on wallplates (sold separately).

Item Description

40W/VA Min 500W 400VA Max, 120 Volt AC 60Hz, Single-Pole & 3-Way, 180 Degree, 400 Sq. Ft. Coverage, Decora® Passive Infrared Wall Switch Occupancy Sensor, Residential Grade - Ivory

Technical Information

Product Features

Switch Type: Single-Pole & 3-Way

Adjustment: Manual

Sensor Technology: Passive Infrared

Pattern Degrees: 180

Coverage (Sq.Ft.): 0400 Sq. Ft.

Time Adjustment: 15s-15m

Load Rating: 40W/VA Min 500W 400VA
Max

Voltage: 120 Volt AC 60Hz

Neutral Wire Connection: Not Required

Photo Cell: Ambient Override ON

Color: Ivory

Standards and Certifications: UL/CSA

Warranty: 2-Year Limited

Field of View (in feet)

-  Major Motion, IR
-  Minor Motion, IR
