

**RoHS2 Compliance Statement for
Zinc Die Cast Fittings, Malleable Iron Fittings, Zinc-Plated Steel parts and
Components, & Non-Metallic Fittings and Components**

To Our Valued Customers,

Zinc die cast fittings manufactured and sold by Bridgeport Fittings are made with high quality, Zamak #3 or #7 alloys. These alloys have ingredients which include Lead at 0.005% (max. by weight) and Cadmium at 0.004% (max. by weight). The RoHS2 certification specification limit for Lead is 0.1% (max. by weight) and for Cadmium is 0.01% (max. by weight). All Bridgeport Fittings zinc die cast products comply with the RoHS2 European Directive 2011/65/EC.

Bridgeport Fittings only sells or manufactures zinc-plated, malleable iron products (fittings, straps, hubs, etc.), or zinc-plated steel components (fittings, straps, washers, etc.) which **do not** contain Hexavalent Chromium. This substance is also **not** used in the corrosion treatment of our malleable iron products. All Bridgeport Fittings, zinc-plated components comply with the latest European Directive 2011/65/EC.

In addition, Polypropylene (Insulating Bushings, Metaliners, and Lock-A-Liners), Polyethylene (Pull Caps and Liquid Tight Gland Seals), and Nylon (Snap-In NM-B Connectors and Cable Stackers), other non-metallic fittings and components offered or manufactured by Bridgeport Fittings, **do not** contain PPB (Polybrominated biphenyls) nor PBDE (Polybrominated diphenyl ether). All Bridgeport Fittings plastic products and components comply with the RoHS2 European Directive 2011/65/EC.
