1.0 Introduction

1.1 Manual Organization
This Installation Manual describes the safe installation, testing and operation of the Eaton® SPD Series Surge Protective Device (SPD).

This manual is organized into seven sections, as follows:

1.0 Introduction
2.0 Installation
3.0 Operating Features
4.0 Troubleshooting
5.0 Specifications
6.0 Ordering Guidelines
7.0 Warranty

1.2 Product Overview
The Eaton SPD Series protects critical electrical and electronic equipment from damage by power surges. This is done by shunting high energy lightning surges (and other transient disturbances) away from the equipment being protected. It does this in nanoseconds by providing a low impedance surge path to ground while supporting power frequency voltage.

The Eaton SPD Series is designed to mount on Panelboards, Switchgear, Switchboards, Busway, and Motor Control Centers (MCCs). It is available with surge current capacity ratings from 50 to 400 kA.

The Eaton SPD Series is available in three feature packages (Basic, Standard, and Standard with Surge Counter), as described in Section 3, "Operating Features." Each model is available in Delta, Wye, and Split Phase wiring configurations.

All Eaton SPD Series models have been tested and certified by Underwriter’s Laboratory (UL®), to comply with UL Standard 1449, 3rd Edition.

Eaton’s One-Port low-voltage Surge Protective Device Wye Models SPD120480Y2C, SPD160480Y2C, SPD200480Y2C and Delta Models SPD120480D2C, SPD160480D2C, SPD200480D2C meet the requirements of IEC 61643-11 / EN 61643-11, Part 11: Test Class II, and are intended to be installed in indoor applications with a degree of protection rated IP 00.

1.3 Safety Precautions
A licensed/qualified electrician must complete all instructions in this manual in accordance with the National Electric Code (NEC®), state, and local codes, or other applicable country codes. All applicable local electrical codes supersede these instructions.

**WARNING**

IMPROPER INSTALLATION COULD CAUSE DEATH, INJURY AND EQUIPMENT DAMAGE. FOLLOW ALL WARNINGS AND CAUTIONS. COMPLETELY READ AND UNDERSTAND THE INFORMATION IN THIS INSTRUCTION MANUAL BEFORE ATTEMPTING TO INSTALL OR OPERATE THIS EQUIPMENT.

IMPROPER WIRING COULD CAUSE DEATH, INJURY AND/OR EQUIPMENT DAMAGE. ONLY LICENSED/QUALIFIED ELECTRICIANS WHO ARE TRAINED IN THE INSTALLATION AND SERVICE OF ELECTRICAL SERVICES ARE TO INSTALL AND SERVICE THIS EQUIPMENT.

HAZARDOUS VOLTAGES ARE PRESENT INSIDE THE SPD DURING NORMAL OPERATION. FOLLOW ALL SAFE WORK PRACTICES TO AVOID ELECTRICAL SHOCK.

---

1.4 Catalog Numbering System
Each Eaton SPD Series unit has a name plate that identifies the parameters used for manufacture. These parameters are expressed in letters and numbers, to reflect the Series, kA Rating, Voltage Code, Feature Package, and Application.

<table>
<thead>
<tr>
<th>Table 1. Catalog Numbering System</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>SPD</strong></td>
</tr>
<tr>
<td>Series</td>
</tr>
<tr>
<td>kA Rating</td>
</tr>
</tbody>
</table>

For example, a 480 volt Delta (3-wire plus Ground) for use in an MCC application requires an SPD model SPD 250480D2J, where:

- SPD = SPD model,
- 250 = the kA rating (50 – 400 kA),
- 480D = the voltage,
- 2 = the feature package (Basic, Standard, Standard With Surge Counter), and,
- J = the Application Suffix (such as Direct Bus Mounted in a panelboard or Connected Through a Circuit Breaker).

These numbers appear as part of the product label attached to the front left side of the SPD. See Figure 1.

---

**EATON**

**SPD Products**

Surge Protective Device
Contains no serviceable parts
Model No.: SPD100208Y3A
DATE CODE: C090301
S/N: 29594
SCCR: 200 kA
Nominal Discharge Current Rating (In): 20 kA
MCOV Rating: 300 L-L; 150 L-N, L-G, N-G
Sys. Voltage: 120-208
Sys. Frequency: 50-60 Hz
VPR: 1000 L-L; 700 L-N, L-G, N-G
Type 1 Enclosure

Suitable for Use on a Circuit Capable of Delivering Not More Than 200,000 rms Symmetrical Amperes.

Figure 1. Product Label
1.5 Equipment Testing

**WARNING**

CONDUCTING DIELECTRIC, MEGGER, OR HI-POTENTIAL TESTING WITH THE SPD INSTALLED WILL CAUSE INTERNAL DAMAGE TO THE SPD. THE SPD WILL ALSO CAUSE THE TEST TO FAIL.

Every Eaton SPD Series unit is tested at the factory for dielectric breakdown. No further SPD testing is required for installation.

If you desire to test distribution equipment by performing dielectric, megger, or hi-potential tests, any installed SPD must be disconnected from the power distribution system to prevent damage to the unit.

Follow this procedure to safely disconnect the SPD:

1. Remove bus connected SPDs completely from the installation prior to performing any form of hi-potential testing.
2. Isolate SPDs connected via conductors as follows:
   a. 3-wire delta SPDs: Turn off the circuit breaker to isolate the SPD, if connected through a circuit breaker.
   b. Wye connected SPDs: Turn off the circuit breaker and remove the Neutral connection.
3. Remove MCC units with SPDs from the MCC structure.

2.0 Installation

**WARNING**

INSTALLING AN SPD THAT IS IMPROPERLY RATED FOR THE ELECTRICAL SYSTEM VOLTAGE COULD CREATE A POTENTIALLY HAZARDOUS CONDITION, RESULTING IN INJURY OR EQUIPMENT DAMAGE.

2.1 Preparation for Installation

**CAUTION**

EATON SPD SERIES PRODUCTS MUST BE INSTALLED OR REPLACED BY A QUALIFIED ELECTRICIAN TO AVOID INJURY OR EQUIPMENT DAMAGE.

Before installing an Eaton SPD Series unit, do the following:

- Verify that the area is clear of any dirt, debris or clutter that may hamper the installation process.
- Verify that there is enough space in the cabinet or MCC to install the SPD. See Section 2.3, “Installation Procedures” for dimensions.
- Confirm that all tools and equipment needed for the installation are available.
- Confirm that the system voltage and wiring configuration is the same as the SPD you are installing. Check the voltage rating label on the front left side of the SPD. See Figure 1.

**WARNING**

TURN OFF THE POWER SUPPLY BEFORE WORKING IN ANY ELECTRICAL CABINET OR ON ANY CIRCUIT BREAKER PANEL. FAILURE TO DO SO COULD RESULT IN INJURY OR DEATH FROM ELECTRICAL SHOCK.

2.2 Installation Locations

Eaton’s SPD Series can be installed directly to the bus for Panelboard applications.

The SPD can also be connected through a circuit breaker for installations in Panelboards, Switchboards, Switchgear, MCC’s and Busway applications.

Follow these guidelines to determine the best location for mounting this product.

2.2.1 Direct Bus Mount Applications

- Install the SPD on the load side of the main breaker. Connect the SPD directly to the bus located as close as possible to the main breaker.

2.2.2 Connected Through a Circuit Breaker Applications

- Install the SPD next to the first breaker after the incoming main lugs or main breaker.

2.3 Installation Procedures

2.3.1 Direct Bus Mount Applications

1. Verify that the SPD you are about to install is rated for the application voltage and system. See Table 5 in Section 6, “Ordering Guidelines”.
2. Follow all national, state and local electrical codes when connecting the SPD.
3. Before mounting the SPD, first determine the bus bar configuration. If the panelboard uses an offset B-Phase bus bar configuration, no action is required. If the panelboard uses a coplanar bus bar configuration, remove the bus bar extension bushing from the back of the SPD and discard. See Figure 2.
4. Mount the SPD to the support brackets (customer supplied) using #10 fasteners and tighten to 4.1 Nm (36 in-lbs). See Figures 4 and 5 for mounting details.
5. Install the bus mount fasteners and tighten to 4.1 Nm (36 in-lbs). See Figure 3.

**NOTICE**

A POOR GROUND, OR GROUNDING/BONDING VIOLATIONS, COULD PREVENT THE SPD FROM PERFORMING AS SPECIFIED.

DO NOT USE THE SPD TO CARRY OR PASS THROUGH GROUND TO OTHER DEVICES OR LEADS. DAMAGE TO THE EQUIPMENT MAY RESULT.

- Check the facility grounding system. All grounding, bonding, and earthing must meet the NEC and any other national, state and local electrical codes.

![Figure 2. Bus Bar Extension Bushing](image)
6. Select the correct wiring diagram for the SPD you are installing. You must refer to this diagram while wiring the SPD. See Figures 6, 7, 8, and 9, on page 4.

Figure 3. Bus Connection

Figure 4. Dimensions for 50-200kA Units

Figure 5. Dimensions for 250-400kA Units
Effective November 2013

Eaton SPD Series
Surge Protective Device for Integrated Units

Figure 6. Wiring - Single Phase Units (230 L)

Figure 7. Wiring - Split Phase Units

Figure 8. Wiring - 3-Phase Delta Units

Figure 9. Wiring - 3-Phase Wye Units

Figure 10. Wiring - High Leg Delta Units

Note: Please consult the factory for 240 delta high leg (4W+G) applications with high leg on the ‘C’ Phase.
7. Connect the System Ground wire (green) to the SPD’s Surge Ground connection using a ring terminal suitable for use with a #10 fastener and a #10-32 x 3/8” fastener (customer supplied). Tighten the Surge Ground connection to 4.1 Nm (36 in-lbs). If the system uses an isolated ground, connect the isolated ground wire to Surge Ground. There are two Surge Ground connection points provided on the SPD. Connect only one of them. See Figure 11.

Figure 11. Ground Connection

8. If equipped, connect the System Neutral wire (grey or white) to the SPD. Connect the System Neutral wire to the SPD’s Neutral connection using a ring terminal suitable for use with a #10 fastener and a #10-32 x 3/8” fastener (customer supplied). Tighten the Neutral connection to 4.1 Nm (36 in-lbs). There are two Neutral connection points provided on the SPD. Connect only one of them. See Figure 12.

Figure 12. Neutral Connection

9. The SPD (Standard and Standard with Surge Counter models) also has an available connection for remote monitoring of the Form C relay contacts. See Figure 13. This is a green connector located on the side of the SPD. To make the connection, remove the green connector and install the remote monitor leads (connector supports 12-24AWG wire). Fasten the remote monitoring wires to the N.O., N.C and COM connection points per the label on the front of the SPD. Contacts are rated: 150 Vac or 125 Vdc at 1A. Follow all national, state and local electrical codes. With wiring complete, plug the green connector into the SPD.

Figure 13. Form C Connection

10. Install the dead-front panel to complete the installation.

2.3.2 Connected Through a Circuit Breaker Applications

1. Verify that the SPD you are about to install is rated for the application voltage and system. See Table 5 in Section 6, “Ordering Guidelines”.

2. Follow all national, state and local electrical codes when connecting the SPD.

3. Mount the SPD to the support brackets (customer supplied) using #10 x 2-3/4” fasteners and tighten to 4.1 Nm (36 in-lbs). For 50-200kA models, see Figure 4 for mounting dimensions. For 250-400kA models, see Figure 5 for mounting dimensions. Note: Mount the SPD as close as possible to the circuit breaker.

4. Determine the wire length required to connect to the breaker and cut Phase wires to the appropriate length. (To maximize SPD performance, wire length should be as short as possible). Note: For wire lengths longer than 4”, Phase wires should be twisted once for each 4” of wire length to maximize SPD performance.

5. Connect Phase wire to circuit breaker. NEC requires that conductors to a surge device be protected by an overcurrent protection device. The cables on the SPD are #10 AWG, therefore would require a 30A 3-pole breaker. See Figure 14, and the wiring diagrams shown in Figures 6, 7, 8 and 9.

Figure 14. Phase Connections
6. Connect the System Ground wire (green) to the SPD’s Surge Ground connection using a ring terminal suitable for use with a #10 fastener and #10-32 x 3/8" fastener (customer supplied). Tighten the Surge Ground connection to 4.1 Nm (36 in-lbs). If the system uses an isolated ground, connect the isolated ground wire to Surge Ground. There are two Surge Ground connection points provided on the SPD. Connect only one of them. See Figure 11.

7. If equipped, connect the System Neutral wire (grey or white) to the SPD. Connect the System Neutral wire to the SPD’s Neutral connection using a ring terminal suitable for use with a #10 fastener and #10-32 x 3/8" fastener (customer supplied). Tighten the Neutral connection to 4.1 Nm (36 in-lbs). There are two Neutral connection points provided on the SPD. Connect only one of them. See Figure 12.

8. The SPD (Standard and Standard with Surge Counter models) also has a connection available for remote monitoring of the Form C relay contacts. See Figure 14. This is a green connector located on the side of the SPD. To make the connection, remove the green connector and install the remote monitor leads (connector supports 12-24 AWG wire). Turn all the remote monitoring wires to the N.O., N.C. and COM connection points per the label on the front of the SPD. Contacts are rated: 150 Vac or 125 Vdc at 1A. Follow all national, state and local electrical codes. With wiring complete, plug the green connector into the SPD.

9. The final step of the SPD installation depends on the specific application. The various applications are listed below by catalog suffix.

   a. Suffix ‘B’: This is the Remote Display Panel (RDP) option. The RDP option requires the addition of a factory supplied RDP cable. See Section 3.3, “Remote Display Panel (RDP) Option” for Cable Catalog numbers.

      1. Install the RDP using cutout and mounting dimensions provided in Figure 15.

   b. Suffix ‘C’: This unit is intended for use in Panelboard, Switchboard, and Busway applications.

      1. Ensure that the dead-front or door has the appropriate cut-out to accommodate the SPD Display. See Figure 4 or Figure 5.

      2. Install dead-front or door and secure.

   c. Suffix ‘J’: This unit is intended for MCC applications that require a NEMA 12 enclosure rating.

      1. Ensure that the MCC bucket door has the appropriate cut-out to accommodate the SPD Display. See Figure 4 or Figure 5.

      2. Place an appropriate NEMA 12 rated gasket around the Display opening on the inside of the door.

      3. Install the door and secure.
3.0 Operating Features

3.1 General
The Eaton SPD Series comes in three feature packages: Basic, Standard, and Standard with Surge Counter. The operating specifics of each feature package are described below:

The Eaton SPD Series requires no operator involvement, other than to monitor the display panel to determine status of the SPD.

After system power is applied, the SPD automatically begins protecting downstream electrical equipment from voltage transients.

Some SPD units have a Form C relay contact that allows for the remote indication of SPD status. Form C contact wires are connected via a three terminal connector. See Figure 13.

3.2 Displays and Indicators
All Eaton SPD Series units (Basic, Standard, and Standard With Surge Counter) use a display panel to indicate system status. The display panel is slightly different for each feature package.

Each display has both green and red light emitting diodes (LEDs) to indicate the status of the protection on each phase. Green indicates the phase is fully protected, Red indicates a loss of protection. Wye, Split Phase and High-Leg Delta units have an additional set of green/red LEDs to indicate status of Neutral/Ground protection.

When the LEDs turn red, an audible alarm will also sound on units equipped with an audible alarm.

Specific operating conditions displayed for each Eaton SPD Series Feature Package are described below.

3.2.1 Basic Feature Package
The Eaton SPD Basic Feature Package display is shown in Figure 18.

The Basic Feature Package has the following features:

- Green LEDs: Illumination indicates the phase is fully protected, and operating normally, with all protection active and available. Green LEDs also indicate Neutral to Ground protection on units with a Neutral wire. Green LEDs do not indicate on/off status of power.
- Red LEDs: Illumination indicates a loss of protection, and that one or more protective devices are now inactive and unavailable for that Phase. Red LEDs also indicate Neutral to Ground protection on units with a Neutral wire. Red LEDs do not indicate on/off status of power.

3.2.2 Standard Feature Package
The Eaton SPD Series Standard Feature Package display is shown in Figure 19.

![Figure 19. Standard Feature Package Display](image)

The Standard Feature Package has the following features:

- All features of the Basic Feature Package.
- One Form C relay contact rated at 150Vac or 125Vdc @1A.
  - Normal operating conditions. N.O. = OPEN, N.C. = CLOSED.
  - Loss of protection on any phase or loss of power. N.O. = CLOSED, N.C. = OPEN.
- Audible alarm with Reset push button.
- EMI/RFI filtering.

3.2.3 Standard With Surge Counter Feature Package
The Eaton SPD Series Standard With Surge Counter Feature Package display is shown in Figure 20.

![Figure 20. Standard With Surge Counter Feature Package Display](image)

The Standard With Surge Counter Feature Package has the following features:

- All features of the Standard Feature Package.
- LCD screen that displays surge count.
- Reset button to RESET the surge counter to zero.
3.2.4 SPD Display Rotation
The SPD display can be rotated on the SPD enclosure, up to 360 degrees. This allows you to position the display for the best visibility regardless of the position in which the SPD is installed. Rotations are at 90, 180, and 270 degrees. For a typical horizontal mounting see Figure 21. For a typical vertical mounting see Figure 22.

Reposition the SPD display as follows:
1. Remove power from the unit.
2. Remove and discard the perforated overlay material at the two opposite corners of the display.
3. Remove the two phillips head screws that hold the display.
4. Rotate the display to the desired position. Be careful not to overstress the display ribbon cable.
5. Place the display back onto the SPD enclosure. Again, be careful not to overstress or crimp the ribbon cable.
6. Replace the two phillips head screws. Tighten screws to 1.35 Nm (12 in-lbs).
7. Restore power to the unit.

Figure 21. Typical Horizontal Display Mounting

Figure 22. Typical Vertical Display Mounting

3.3 Remote Display Panel (RDP) Option
The Eaton Series SPD displays may be monitored on a remote display panel (RDP). This is indicated by the catalog style with a ‘B’ suffix (such as SPD250480D2B).

A separately purchased RDP cable is required to connect the SPD unit to the display.

Table 2 lists these cables and their part numbers.

3.4 IEC Approved Models
Eaton’s One-Port low-voltage Surge Protective Device Wye Models SPD120480Y2C, SPD160480Y2C, SPD200480Y2C and Delta Models SPD120480D2C, SPD160480D2C, SPD200480D2C meet the requirements of IEC 61643-11 / EN 61643-11, Part 11: Test Class II, and are intended to be installed in indoor applications with a degree of protection rated IP 00.

The SPD Delta and Wye Models are intended for use with a 3 Phase TN-S System with PE and Neutral Distribution, 5 conductor with a minimum 10 AWG or 6 mm². The Delta Models are also intended for use with a 3 Phase TN-C System with PEN Distribution, 4 conductor with a minimum 10 AWG or 6mm². Screws used for connection to ground shall be #10-32 x 3/8” and shall not be zinc or aluminum. This product is not serviceable and contains no replaceable parts.

Additional product information and ratings for IEC Applications:
- The SPD contains internal disconnects with a short circuit current rating Iₜ₅₀₀ₐ₉₅₀₀ of 200kA.
- Residual Current IPE for this product is 5 mA.
- Operating temperature is Normal -5°C to 40°C (23°F to 104°F).
- Humidity range is 5% through 95% non-condensing.
- The SPD may be mounted directly to earthed conductive surface, installed as per this manual.
- Temporary overvoltage rating UT = 402.6 V.
- Withstand or safe failure mode, for tT = 120 minutes, UT = 526 V.
- Modes of protection as marked on a Wye SPD = L-L, L-N, L-G(PE), N-G(PE).
- Modes of protection as marked on a Delta SPD = L-L, L-G(PE).
4.0 Troubleshooting

Many SPD failures result from improper installation. Once the SPD is installed properly, it is a highly reliable unit.

If the SPD does not function properly, first confirm that it is installed properly. See Section 2, “Installation.”

If the SPD malfunctions after it has been operating routinely, refer to Table 3. This Troubleshooting Chart identifies possible causes and solutions to the malfunction. Further assistance may be obtained by calling Eaton’s Applications Engineers, at 1-800-809-2772, option 4, sub-option 2, including being directed to the warranty process if applicable.

**NOTE:** Units used in Panelboard applications are available in 50 – 200kA ratings only

**NOTE:** Use the 'C' option for Panelboard Applications when unit is connected through a Circuit Breaker

---

**Example:** SPD 250480D2J = SPD Series, 250kA Per Phase, 480D Voltage, Standard Feature Package, Motor Control Center Application.

---

**Eaton’s Wye Catalog Numbers SPD120480Y2C, SPD160480Y2C, and SPD200480Y2C and Eaton’s Delta Catalog Numbers SPD120480D2C, SPD160480D2C, and SPD200480D2C meet the requirements of IEC 61643-11/EN 61643-11, Part 11: Test Class II, and intended to be installed in indoor applications with a degree of protection rated IP 00.”
7.0 Warranty

Eaton warrants these products for a period of 10 years from the date of delivery to the purchaser, 15 years if the product is properly registered with Eaton, to be free from defects in both workmanship and materials. Eaton assumes no risk or liability for results of the use of the products purchased from it, including but without limiting the generality of the foregoing: (1) The use in combination with any electrical or electronic components, circuits, systems, assemblies, or any other materials or substances; (2) Unsuitability of any product for use in any circuit or assembly.

Purchaser’s rights under the warranty shall consist solely of requiring Eaton to repair, or at Eaton’s sole discretion, replace, free of charge, F.O.B. factory, and defective items received at said factory within said term determined by Eaton to be defective. The giving of or failure to give any advice or recommendations by Eaton shall not constitute any warranty by or impose any liability upon Eaton. The foregoing constitutes the sole and exclusive liability of Eaton AND IS IN LIEU OF ANY AND ALL OTHER WARRANTIES EXPRESSED, IMPLIED OR STATUTORY AS TO THE MERCHANTABILITY, FITNESS FOR PURPOSE SOLD, DESCRIPTION, QUALITY, PRODUCTIVENESS OR ANY OTHER MATTER.

In no event shall Eaton be liable for special or consequential damages or for delay in performance of the warranty.

This warranty does not apply if the product has been misused, abused, altered, tampered with, or used in applications other than specified on the nameplate. At the end of the warranty period, Eaton shall be under no further warranty obligation expressed or implied.

The product covered by this warranty certificate can only be repaired or replaced by the factory. For help on troubleshooting the SPD, or for warranty information, call 1-800-809-2772, Option 4, sub-option 2. Repair or replacement units will be returned collect. If Eaton finds the return to be a manufacturer’s defect, the product will be returned prepaid.

EATON - CONFIDENTIAL AND PROPRIETARY NOTICE TO PERSONS RECEIVING THIS DOCUMENT AND/OR TECHNICAL INFORMATION IN THIS DOCUMENT, INCLUDING THE DRAWING AND INFORMATION CONTAINED THEREON, IS CONFIDENTIAL AND IS THE EXCLUSIVE PROPERTY OF EATON, AND IS MERELY ON LOAN AND SUBJECT TO RECALL BY EATON AT ANY TIME. BY TAKING POSSESSION OF THIS DOCUMENT, THE RECIPIENT ACKNOWLEDGES AND AGREES THAT THIS DOCUMENT CANNOT BE USED IN ANY MANNER ADVERSE TO THE INTERESTS OF EATON, AND THAT NO PORTION OF THIS DOCUMENT MAY BE COPIED OR OTHERWISE REPRODUCED WITHOUT THE PRIOR WRITTEN CONSENT OF EATON. IN THE CASE OF CONFLICTING CONTRACTUAL PROVISIONS, THIS NOTICE SHALL GOVERN THE STATUS OF THIS DOCUMENT.

DISCLAIMER OF WARRANTIES AND LIMITATION OF LIABILITY

The information, recommendations, descriptions and safety notations in this document are based on Eaton’s (“Eaton”) experience and judgment and may not cover all contingencies. If further information is required, an Eaton sales office should be consulted. Sale of the product shown in this literature is subject to the terms and conditions outlined in appropriate Eaton selling policies or other contractual agreement between Eaton and the purchaser. THERE ARE NO UNDERSTANDINGS, AGREEMENTS, WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING WARRANTIES OF FITNESS FOR A PARTICULAR PURPOSE OR MERCHANTABILITY, OTHER THAN THOSE SPECIFICALLY SET OUT IN ANY EXISTING CONTRACT BETWEEN THE PARTIES. ANY SUCH CONTRACT STATES THE ENTIRE OBLIGATION OF EATON. THE CONTENTS OF THIS DOCUMENT SHALL NOT BECOME PART OF OR MODIFY ANY CONTRACT BETWEEN THE PARTIES.

In no event will Eaton be responsible to the purchaser or user in contract, in tort (including negligence), strict liability or otherwise for any special, indirect, incidental or consequential damage or loss whatsoever, including but not limited to damage or loss of use of equipment, plant or power system, cost of capital, loss of power, additional expenses in the use of existing power facilities, or claims against the purchaser or user by its customers resulting from the use of the information, recommendations and descriptions contained herein.
