

# Rockwell Automation

## Visualization Virtual Roadshow 2021

The world changed in many ways over the last year, including manufacturing facilities. COVID-19 drove the need to increase productivity and security in facilities, while also challenging the status quo in terms of how machine operators do their respective jobs. Increased sanitation requirements and limitations due to social distancing also required doing things in different ways while achieving the same or greater output .

Join us for a conversation on real-world manufacturing issues and how they can be addressed with state-of-the-art Visualization Systems including our new line of Industrial PCs, software enhancements and thin client technology.

Improve Productivity, Increase Security and Reduce Time to Market with Modern Visualization Solutions

### Agenda

#### Introduction

Speakers and Topics

The Visualization Solution Portfolio

#### Empowering Flexible and Scalable Operations

The Technology

Remote Operations & Diagnostics

Making your Facility More Secure

The Human Side

Workforce Turnover, Generational Attrition

Worker Safety and Productivity

Greater Uptime, Decreased MTTR

#### Conclusion and Call to Action

This is an Online Event – One Session, Five Different Times to Choose From

**Session 1 – July 13 11:00AM (ET) 1 HR**

**Session 2 – July 13 3:00PM (ET) 1 HR**

**Session 3 – July 20 11:00AM (ET) 1 HR**

**Session 4 – July 20 3:00PM (ET) 1 HR**

**Session 5 – August 24 3:00PM (ET) 1 HR**

Pick a session and **REGISTER TODAY!**
